

“Yukawa” coupling between Ising order and Fermi surface

$$\mathcal{S}_{\phi c} = -g \int d\tau \sum_{\alpha=1}^{N_f} \sum_{\mathbf{k}, \mathbf{q}} \phi_{\mathbf{q}} (\cos k_x - \cos k_y) c_{\mathbf{k}+\mathbf{q}/2, \alpha}^{\dagger} c_{\mathbf{k}-\mathbf{q}/2, \alpha}$$

for spatially dependent  $\phi$
